

Gripple Serving the food industry

G GRIPPLE®

SAVES TIME · SAVES MONEY

Stainless steel hangers that meet food industry standards

CORROSION RESISTANT | STRONG & VERSATILE | FAST INSTALLATION

NEW PRODUCT FACT SHEET

1. STAINLESS STEEL HANGERS

The stainless steel Gripple Hangers offer the ideal corrosion resistant solution for all areas of the food industry, and has been specifically designed for internal environments with persistently high humidity and saturated atmospheres – including environments subject to frequent cleansing and hygiene procedures.

2. SAVES YOU TIME AND MONEY

Because Gripple offers a simple solution that is up to 6 times faster and much easier to install, you are able to make huge cost savings in almost all installations. Combine that with its versatility and light weight, and you have an unbeatable solution for suspending M&E services.

3. QUICK AND SIMPLE TO INSTALL

Stainless springs
Corrosion-free and long lasting

Stainless body
Corrosion-free and reliable in the highest humidity, and even those subjected to frequent cleansing and hygiene procedures.

Ceramic wedges
Holds the cable firmly in a virtually unbreakable, corrosion-free grip.

4. AVAILABLE IN 2 SIZES

No 2 Holds up to 45kg **No 3** holds up to 90kg

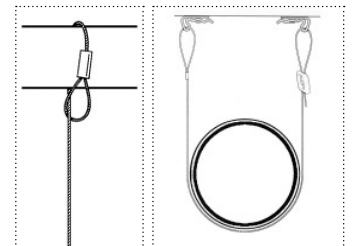

The above sizes have a 5:1 safety factor built in

5. CHOOSE THE BEST FIXING FOR YOU

Gripple fixing kits are available in any length of stainless wire rope to suit your application and save time trimming on site. Loop or stud end fixing available.

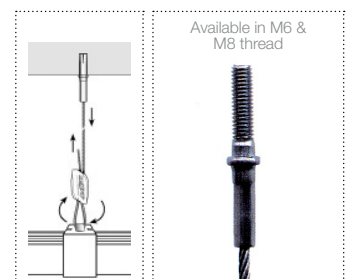

Loop fixing

A simple but highly flexible fixing allows the cable to be looped around bar joists or purlins in a variety of ways.

Stud fixing

A stainless steel stud provides an excellent way to fix the Hanger into a concrete structure using a drop in anchor, supplied free with each kit.

6. CERTIFIED FIRE SAFE SOLUTION

The stainless steel Gripple Hangers have been independently tested by Chiltern International Fire Limited. As a result of these tests the Hangers have been certified to carry a designated load. Full details available upon request.

7. TAILOR-MADE SOLUTIONS

We are constantly looking to extend the range of applications for the Gripple. If you have any specialist requirements, we would be pleased to discuss a tailor-made solution to meet your needs.
