

PRODUCT SPECIFICATIONS:

Fixtures:

- Line voltage LED Lightbars are constructed of high quality extruded aluminum
- Durable powder-coated finish ensures a sleek appearance in all installations
- Architectural-grade diffuser eliminates unsightly hot spots and ensures an even, pleasing distribution of light

LED Module:

- High-ranked binning of **LM-80 rated LEDs** for crisp white light and color uniformity

Installation:

- Easy installation with pressure clips and double-sided tape
- Hardwire and plug-in configurations allow the Lightbars to adapt installation needs for any situation
- Additional tools not required for most installations

Driver:

- Integral low-voltage driver – no additional external ballast or driver needed

Photometrics:

- Visit www.maxlite.com for complete **photometric and IES files** for LED Lightbars

Warranty:

- Backed by **MaxLite's five-year limited warranty**

LED PLUG-AND-PLAY LIGHTBARS

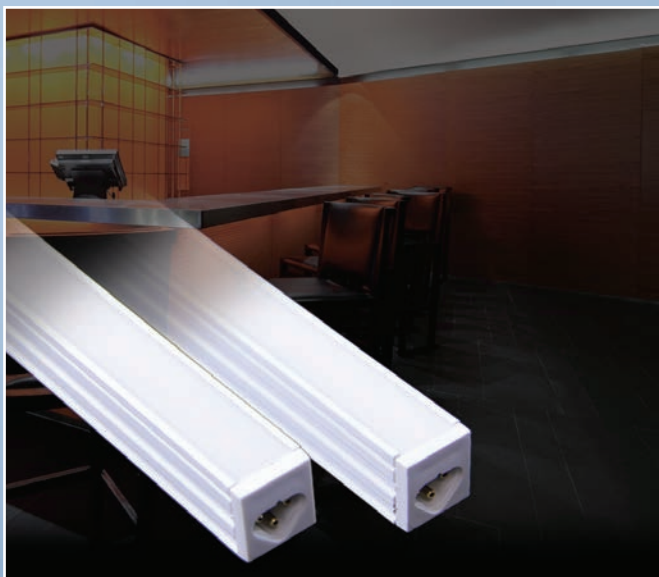

Dimmable

LED Lightbars For Home, Office and Hospitality

MAX13106-20130405

LED PLUG-AND-PLAY LIGHTBARS: DO IT YOURSELF

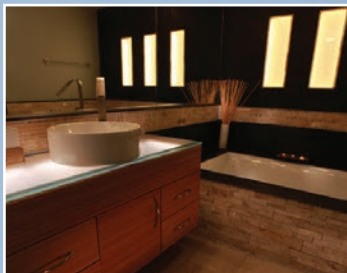

MaxLite's LED Plug-and-Play Lightbars are **dimable** accent, under cabinet, and indirect lighting fixtures featuring **high lumen output** and an integral driver that plugs directly into existing 120-volt systems. Part of the MaxLED® family of products, MaxLite's LED Lightbars are available in 3.1- to 8.6-watts.

Constructed with propriety binned **LM-80-rated LED** chips for color consistency, the LED Lightbars have a long-lasting life of up to **50,000 hours**.

The self-driven LED lightbars feature a diffuser cover that minimizes glare and delivers even light in commercial and residential applications, including bathrooms, conference rooms and lobbies, factory workspaces, and foyers in homes, retailers, restaurants, hotels and other commercial and hospitality venues.

LED Lightbars Enlighten Dreary Spaces

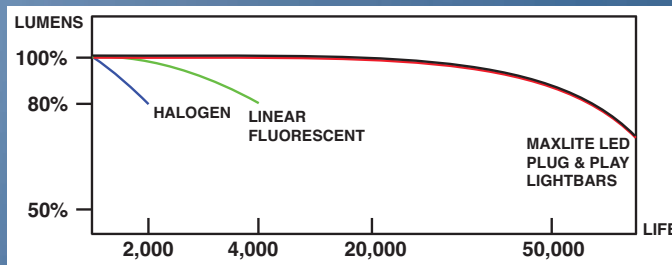

MaxLite's Plug-and-Play LED Lightbars were featured on the "Bath Crashers" on the DIY Network, from the makers of HGTV. On Episode 404 "Basement Bathroom Overhaul," MaxLite's LED Lightbars

were professionally installed discreetly in three handmade light boxes that were installed on the bathroom wall, and in the countertop of the bathroom vanity, which made the glass surface glow above. With the use of MaxLite's LED Lightbars, the bathroom now yields a brightly-lit, clean modern look.

MaxLite's LED Plug-and-Play Lightbars' key features include:

- Available in 2700K, 3500K or 5000K CCTs in six-inch and one-foot lengths
- **Dimmable** from 100 down to 15 percent
- Connect up to 30 (8.6 watt) LED Lightbars in a single run
- Hardwire or plug-and-play installations
- Diffuser eliminates hot spots and ensures even light distribution
- Dry-location listed
- **Long 50,000-hour life**
- Leading efficacy is superior to CFL and halogen fixture alternatives
- Mounting clips, double sided tape, connectors and linking cables included

LIFE:

Life: 50,000 hour life is based on L70 standards. When the LEDs' lumen output depreciates by 30 percent, end-of-life is reached, even though the lamp will still provide approximately 70 percent of initial lumens.

APPLICATIONS:

MaxLite's Plug-and-Play LED Lightbars are ideal for residential and commercial environments including:

New Jersey homeowner installation

Residential:

For under base cabinet and other installations where the light source is hidden from view, the LED Lightbars create a brightly lit room with indirect illumination in kitchens and dining areas.

Hospitality:

The LED Lightbars enable continuously lit long runs to accent coves and highlight the architectural integrity of hospitality rooms and lobbies.

Bar and Lounge:

To showcase and accent a room's key features, MaxLite's LED Lightbars provide cool operation to enlighten under base cabinets, toe kicks and other elements in retailers and restaurants.

Libraries:

The LED Lightbars come with a diffuser that minimizes glare and delivers even light distribution while concealing the LEDs from view in library wall and ceiling coves and moldings.
