## RemPhos LEDBLOCK®

### RemPhos "HID to LED" LEDBLOCK® Lamps

The "HID to LED" LEDBLOCK® module family by *RemPhos Technologies* offers an economical alternative to upgrade to long lasting LED lighting, while retaining the original fixture. The LEDBLOCK® series replaces HID (high intensity discharge), HPS (high pressure sodium), and MH (metal halide) type lamps. Extremely efficient at >100LPW, the LEDBLOCK® can be mounted with the provided medium E26 or mogul E39 screw in adaptors or brackets. ETL and DLC Listed (select models). High quality active cooling system with built in TEMPSENSE® automatically lowers power to the LEDs if temperature rises above a preset limit. Multiple lumen output and CCTs are available.

5000K

## Options

10VDIM = 0-10V  
Dimming

## Drivers:

All LEDBLOCK  
include external  
Meanwell® LED  
Drivers.

Ordering Example: RPT-LEDBLOCK-6500LM-5000K

## Details

**Application Features:** The LEDBLOCK® “HID to LED” lamps easily replace older bulb technologies. The lamps are perfect for retrofits. The LED lamps is designed to safely and **quickly** replace most existing bulb types. Product includes all of the mounting hardware and electrical connections required. Some custom installations may require customer to create special brackets to aid

**Electrical:** 89% efficient UL Recognized external Meanwell driver, LM80 LEDs

**Optics:** Patent-pending optical system delivers beautiful light.

**Approvals:** ETL, DLC, FCC, RoHs

**Manufactured:** China – 5 Year Warranty

Example retrofit into rectangular outdoor flood light previously illuminated by 500W HID lamp

Designed by **US**.  
Made by **US**.
