Watcher Series MDK270

ORDERING INFORMATION

Catalog Number: Example: MDK270WHT

PRODUCT SPECIFICATIONS

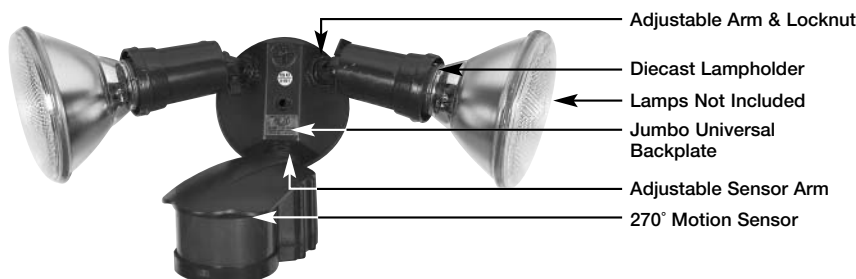

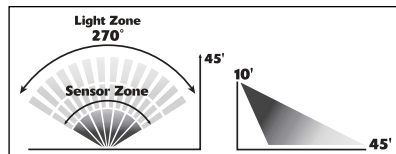

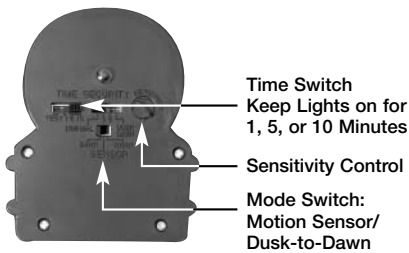

- 270° detection area.
- Instant-on deters intruders.
- Dual Mode allows you to choose between these three options:
 - Motion Sensor Mode – lights turn on automatically when motion is detected.
 - Dusk-to-Dawn Mode – lights turn on automatically at dusk and then off again at dawn.
 - Combo Mode – lights turn on for three or six hours at dusk and convert to motion sensor mode when appropriate time elapses.
- Detects movement up to 45 feet away for maximum security measures.
- Built-in photocontrol for automatic night-time operation.
- Precise pre-set time switch activates lights for 1, 5 or 10 minutes for no more guesswork.
- Photocontrol override for 24-hour operation.
- Variable sensitivity control.
- 1000-watt sensor works easily with other equipment, such as video cameras or alarms, when extra measures are necessary.
- Lampholders are fully adjustable to cover a 180 degree zone with lighting.
- Packaged ready to install.

Parholder Shields

- Easily twists into place.
- Includes two shields per package.
- For use with The Watcher 270 series or The Watcher 180 series only.
- Heat and scratch resistant for long life.
- Protects lamps from dirt and the elements.
